

Performance Case Studies

Overview

- All performance data provided in this document comes from actual customer implementations. Customer names are used, unless the customer has asked to remain anonymous.
- For consistency, all performance case studies refer to WarpEngine – the patented technology at the core of all Badu Networks products.
- WarpEngine is available in both hardware and software form factors for WAN, Wi-Fi, mobile and cloud network and application optimization.
- WarpEngine is branded as WarpVM for VM-based deployment in public and private cloud environments.
